

An aerial view of a city skyline at sunset. The sky is a mix of blue, orange, and yellow, with wispy clouds. The city is filled with numerous skyscrapers and buildings. The Empire State Building is prominent in the center. A semi-transparent dark box is overlaid on the lower half of the image, containing white text.

Project Management

Our state of the art Project Management practice is recognized and awarded for the top management organizations within the world.

THERE IS AN OPPORTUNITY

Common mistakes in Project Management

KEEPING STRATEGY CLOSE TO THE VEST: Proven leaders may have mastered aligning projects to business strategy, but that doesn't mean all team members see the connection. In global project teams, team members may not even speak the same language.

BLOWING COST ESTIMATES: In a deadline-driven world, time is scarce, and you might be tempted to cut corners by relying on experience alone to estimate costs. But comparing projects with similar requirements is only a start to estimating costs, not an end

FAILING TO ESCALATE: A project practitioner with experience might want to solve all issues alone - even ones that require executive-level attention - in an attempt to prove that is ready for the next career level. And that can have the opposite effect when a problem derails the project.

PREPARING AN AMBITIOUS SCHEDULE: The more inexperienced the project manager, the more optimistic he or she becomes when preparing the schedule baseline. While ambitious schedules are nice to have, they are often unrealistic and can make matters worse.

GOLD-PLATING DELIVERABLES: Most project managers want to placate the customer. However, there are limits as to how far the project manager should go. Gold-plating the deliverables after the scope has been agreed to can be very costly.

NOT UNDERSTANDING REQUIREMENTS: The more inexperienced the project manager, he will use his interpretation of the requirements rather than consulting with the subject experts.

HOW WE DELIVER

To empower Project Management

BEVERAGE LEADER COMPANY

BRIEF: the company had an ambitious project of standardization of small stores with the aim of increasing the shopability

SOLUTION: creation and deployment of the PMO (Project Management Office) that centralized the implementation of the project within LA region. The PMO had responsibilities over:

- US\$ 100M budget
- 14 countries
- 65 collaborators

RESULT: the project was taken as a best practice. Deliverables were achieved:

- Operative processes successfully implemented
- 35 risks events mitigated
- -3% budget completion
- PMO established and on going
